UN-15

Serving Your Vision

Ophthalmic Chair
UN-15

Satisfaction guaranteed in everyday use for patient care.

Outstanding Features

The pneumatic-assisted manual recline mechanism uses the patient's weight to enable easy reclining adjustment. The chair can be smoothly adjusted to match the situation, from a comfortable flat position to any desired angle.

Single-handed headrest operation provides smooth patient headrest adjustment, and a unique lock indicator ensures that the headrest is locked firmly and securely in position.

TAKAGI standard fail-safe sealed hydraulic system ensures smooth, long-term operation.

Rear-positioned, foot-activated rotation lock is easily accessible from both sides.

The UN-15 features a dedicated connector that allows power to be supplied from an ophthalmic stand or smart table.
When combined as a unit, it contributes to a smoother, more integrated clinical environment.

*This product is not supplied with a power plug and cannot be operated or used independently.
Always use the UN-15 in combination with the SN-500 or ST-50.
