

Serving Your Vision

Mission

Management Philosophy

Provide products and services that go beyond expectations with reliable quality and skilful technology.

Vision

Management Vision
(2019-2023)

From Takagi Japan to TAKAGI Worldwide

Management

Management Policy

- We are a manufacturing organisation with professionalism.
- We are a development-oriented enterprise creating new values and services, through manufacturing with ambitious thinking.
- We will develop our business focused on health and medical care, building the Takagi brand that will be trusted around the world.
- We will pursue healthy profits and build a WIN-WIN relationship with all stakeholders.
- We give all employees the opportunity of growth to realise a prosperous life.

Values

Personal Principles

- Think carefully
- Act promptly
- Think positively
- Have respect
- Be cost conscious

Message from the President

Thanks to the support and collaboration
that we have received,
Takagi Seiko is entering a new stage.

The position of the Japanese manufacturing industry has changed greatly in the last few decades due to globalisation and IT sophistication. Therefore, product functions are required to be improved and to have more variety.

As a result of such a competitive environment, I believe the role of Takagi Seiko as an ophthalmic medical device manufacturer is to be ahead of customers' expectations and contribute to the development of ophthalmic medical care.

Following our 60th anniversary of establishment, we have formulated a five-year management plan from 2019 to 2023. We will strengthen our management and TAKAGI brand power more than ever. We will also work on investment for future development including strong human resource systems, which will support expansion into new business areas.

President
Kazushige Takagi

Technological strength to support the TAKAGI brand

The essence of Takagi Seiko's manufacturing is the management process from development through to maintenance within the company. Direct communication with customers is not only beneficial to our product development but is also helpful to all departments to accumulate technical improvement, to solve issues and to work on making better products. Hundreds of parts are carefully finished and assembled by highly skilled craftsmen/women who have strong pride for supporting the ophthalmic healthcare industry.

NEXT-Your Vision

Development of New Products

Ability to respond to new needs

Takagi Seiko has grown as a global manufacturer supporting ophthalmic medical care in Japan and over 80 countries around the world. With our extremely high technical skills and manufacturing capability, we continue to improve our products to make them even more user friendly. We maintain prompt and flexible reaction towards market demands in order to implement this to new product development. We are extending our vision from ophthalmic medical care to various fields while committing to further technical development.

PRODUCTS

Main Products

As a brand that goes a step ahead of expectations

Always looking at new domains

Slit Lamps

Slitlamp Microscope 700GL

Innovatively designed LED Slit Lamp with the optical system optimised for an LED light source.

The biggest advantage of changing the light source to LED is that the affected area's and structures of the eye which is hard to capture, will be shown more clearly. 700GL was developed specially for the LED light source, providing a bright and sharp slit light. This slit lamp supports doctors to perform at their very best.

Surgical Instruments

Operating Microscope OM-19

The world's first surgical microscope developed to independently adjust the Red-reflex and Coaxial light intensity according to the medical conditions and preference of the operator.

The type of surgical microscope available in the market before OM-19 had only one light source, and they required simultaneous adjustment of the light intensity of transillumination and coaxial illumination. We have developed the world's first surgical microscope with independent light sources of the red-reflex and coaxial illumination allowing adjustment of each light intensity according to the medical condition and the preference of the surgeon. We are committed to helping patients feel safe and confident to have an operation, by developing superior equipment that delivers superior results.

Visual Inspection Devices

Projection Perimeter MT-325UD

TAKAGI's Projection Perimeter has a track record over several decades, in detecting various visual field abnormalities

Visual Function Test Devices

Contrast Glaretester CGT-2000

Contrast Glaretester can detect minute changes in visual function which are hard to see during standard visual acuity testing.

Tables & Chairs

Smart Table ST-50

The Smart Table was designed with maximum consideration for patient safety and optimised clinical workflow.

Refraction Testing Devices

LCD Vision Chart VC-60

This is a future type visual acuity table that can display cortical vision letter and single letter with one unit.

HISTORY Development

With our customers,
building the trust of the TAKAGI Brand

Takagi Seiko Co., Ltd., founded as Takagi Seisakusho on June 1st 1955, has continued the business to this day with the support from customers, cooperating companies, and employees.

We launched our own brand "TAKAGI" in 1972 and developed products one after another. The TAKAGI brand was seen for the first time at the International Ophthalmological Society held in Kyoto in 1978 and touched the eyes of overseas buyers, which led the TAKAGI brand to expand overseas.

The first TAKAGI Slit Lamp
MT-302DSM

The 23rd International
Ophthalmological Society
(Kyoto, Japan)

- 1955 Founded Takagi Seisakusho
- 1972 Launched TAKAGI brand Reorganized to Takagi Mfg. Co., Ltd.
- 1978 First domestic exhibition at the 23rd International Ophthalmological Society (Kyoto, Japan)
- 1986 First overseas exhibition at the 25th International Ophthalmological Society (Rome, Italy)
- 1990 Reorganized to Takagi Seiko Co., Ltd.
- 1998 Acquired ISO9001, EN46001 and MDD
- 2004 Acquired ISO13485:2003
- 2015 Anniversary of the 60th year of the business, and 25th year of Takagi Seiko Co., Ltd.
- 2022 Opened TVC (Takagi Vision Centre) showroom in Sunshine 60, Ikebukuro, Tokyo

Aiming for the most user-friendly products in the world, we have developed many of the world's first functions.

1972 ○ Launched TAKAGI brand products

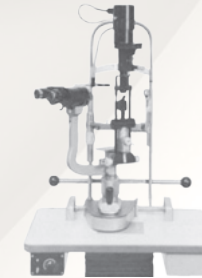

1973 ○ Launched the TAKAGI brand's first slit lamp, **MT-302DSM**
○ Added slit lamp **MT-304-JSM**, **MT-303-OPM** to the range

MT-302DSM
(1973)

MT-304-JSM
(1973)

MT-303-VSM
(1976)

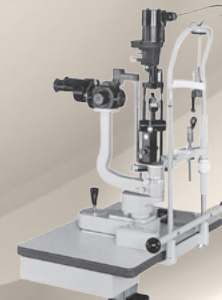

MT-339
(1978)

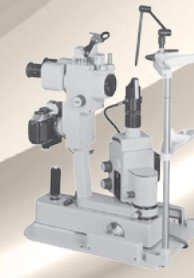

1976 ○ Added slit lamp **MT-303-VSM** to the range
Developed the world's first stopper and vertical motion system that can be operated with one hand*

1978 ○ Developed the world's first joystick trigger*
○ Launched the world's first remote-controlled eyesight table **MT-339***

1983 ○ Released the world's first slit lamp of the Goldman-type Galileo zooming system **SM-3VZ***

SM-3VZ
(1983)

SM-50F
(1986)

SM-70
(1995)

S10-17
(1995)

1986 ○ Released the world's first 50 times zoom photo slit lamp **SM-50F***

1995 ○ Launched slit lamp SM Series (**SM-2**, **SM-4**, **SM-10**, **SM-30**, **SM-70**)
○ Released the world's first combination adapter **S10-17***
(built in Yellow Filter and Beam Splitter)

2014 ○ Released the world's first LED slit lamp with hidden cables **700GL***
○ Released LED surgical microscope **OM-9**

2018 ○ Released smart table **ST-50**
○ Released surgical microscope **OM-19**

(2018)

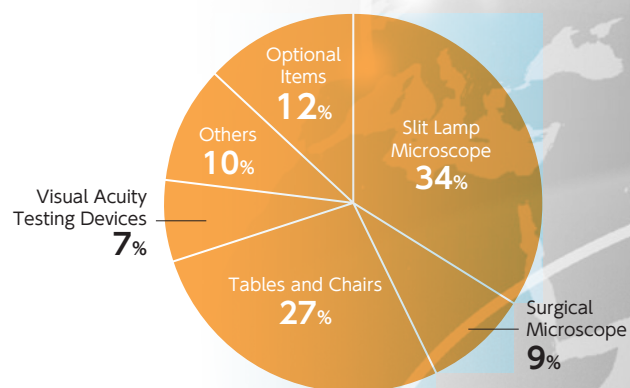

OM-19
(2018)

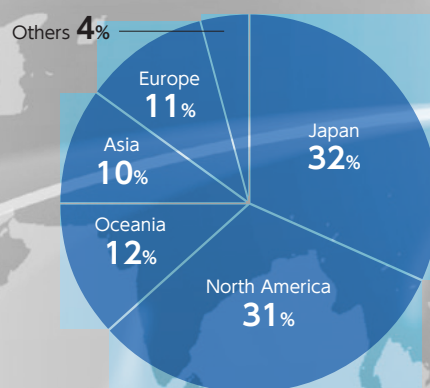

*According to our research

From Takagi Japan to TAKAGI around the world

[Sales by Product]

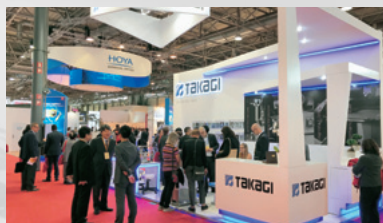

[Distribution Percentage by Region]

The TAKAGI brand now introduced to over 80 countries around the world

About half a century has passed since the launch of the TAKAGI brand. During this time, the distribution area of TAKAGI products has expanded from Japan to North America, Asia, Oceania, Europe, Middle East, Latin America and Africa. TAKAGI products have been proudly supporting the ophthalmic medical care of these countries. Today, approximately 70% of TAKAGI products are exported abroad.

We will further advance our overseas expansion and enhance our technical strength in order to extend our contribution to domestic and overseas ophthalmic medical care. We also plan to challenge new fields by utilising the technical strength of Takagi Seiko.
